

Environmental Curriculum for School Children on Waste Management

Bangladesh Center for Advanced Studies (BCAS), Waste Concern and Bangladesh Center for Environment Education (BCEE) have jointly initiated this project with support from British Council.

The main goal of this project is to develop effective tools to involve all schools of Bangladesh in the solid waste management and recycling related programs to improve the present waste related situation.

The general objective of this project is to enhance the awareness level of school teachers and students of Bangladesh on proper handling and resource recovery from waste. The specific objectives of the project are :

- To develop a teachers manual on waste management for use in Bangladesh
- To train teachers to help them effectively carry out waste management education emphasizing on prevailing concerns specific in their area;
- To help teachers implement year long activities related to waste management in their respective schools to educate children and to create awareness among community members.
- To enable children in selected schools reach out to their families and communities with relevant messages of waste management.
