

**Name of the Project:** Intervention on Promoting Sustainable and Efficient Waste Recycling

**Location:** Dhaka, Bangladesh

**Name of the Client:** Swisscontact- Katalyst

**Duration of the Project:** May 2006 and October 2007

**Objectives of the Project:** The major objective of this intervention is to promote sustainable and efficient waste recycling in Bangladesh by:

- Creating awareness among plastic pallets' and goods' manufacturers for cleaner production by establishing Environmental Management System (EMS) in their facilities.
- Promoting awareness on source separation of waste to make plastic recyclables cleaner and un-soiled.
- Demonstrating source-separation of waste by piloting waste segregation activity within a community in DCC area.
- Providing input for policy reform to improve the plastic waste recycling industry.
